

How To Install DiVinciPay

Step 1

- Select your **DiVinciPay package** and **Sign Up**. The \$99 package provides a 3-day FREE trial.
- Once you have purchased your DiVinciPay package, go to your **DiVinciPay Dashboard**.
- Now that you have arrived at the DiVinciPay Dashboard, you will see **API KEY** and **WIX ACCOUNT ID** and then below are two input fields where you will add the required credentials. To obtain these codes, please complete the following steps.
- Create an API Key on the WIX **API Keys Manager**
- Enter "**DivinciPay**" for the API Key Name and Tick the "**All Permissions**" checkbox and press on "**Generate Key Button**"

Depending on your security settings, you may be required to input a security code that will be emailed to the email address associated with your WIX Account each time you add a new API feature.

The screenshot displays the 'Generate API Key' interface. At the top, there is a title 'Generate API Key' and two buttons: 'Cancel' and 'Generate Key'. Below the title, there is a sub-header 'Generate a new key to access your site and account data.' and a link 'Learn more about generating keys'. A yellow warning box states: 'Keep in mind: Each key you generate has access to all of your sites. For security, only add the permissions you need. Learn more'. The main form is divided into two sections: 'Key details' and 'Permissions'. In the 'Key details' section, there is a 'Name' field with a character count of 32, containing the text 'DivinciPay API Key'. A red arrow points to this field. In the 'Permissions' section, there is a sub-header 'Permissions' and a note 'Select the data you want to access with your key.'. There are five permission options, each with a checkbox: 'All permissions' (checked), 'Basic permissions', 'Get Sites List', 'All account permissions' (checked), and 'All site permissions' (checked). A red arrow points to the 'All permissions' checkbox. The 'All account permissions' and 'All site permissions' options have 'See all' links next to them. A 'View API Reference' link is also present next to the 'Get Sites List' option.

- Copy the **API KEY** and the **ACCOUNT ID** and input them in the setup tab

Enter your WIX Account ID Here

Add / Update Info

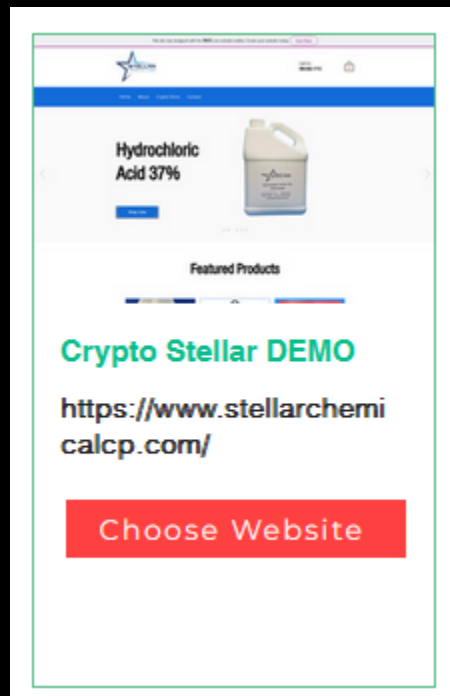

Step 3

- Now that the **API KEY** and the **WIX ACCOUNT ID** have been incorporated into your DiVinciPay profile, you will need to select the site that you want to add the DiVinciPay plugin to, on your existing payment platform (WIX, SQUARE, STRIPE). Do this by pressing the **FETCH MY WEBSITES** button

- We use the Crypto Stellar DEMO website as our example, in the video tutorial, and will use it here, as well.

Select the **CHOOSE WEBSITE** button to continue

- Once you select the **CHOOSE WEBSITE**, you will return to your DiVinciPay Dashboard. Next you will need to provide your MetaMask wallet and select which ERC-20 tokens you would like to accept in your WIX store. If you don't have a MetaMask wallet set up, select the MetaMask Fox to set one up. This should take less than one minute.

Receiving Wallet Address *

Enter your Receiving Wallet Address (ETH Address that will receive the funds)

Payment Complete Redirect Link (Optional)

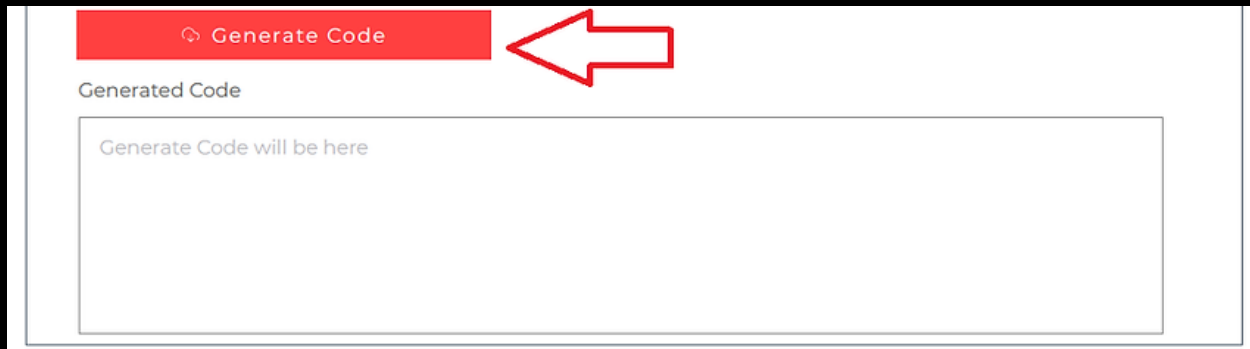

Enter the Link to your website payment complete page

- Once you input your MetaMask wallet address, you will need to select which ERC-20 tokens you are going to accept in your WIX store. This list can be modified at anytime in your DiVinciPay Dashboard. If you do not select a specific token, DiVinciPay will add all available tokens by default. Currently there are 160 tokens listed with over 8,000 available.

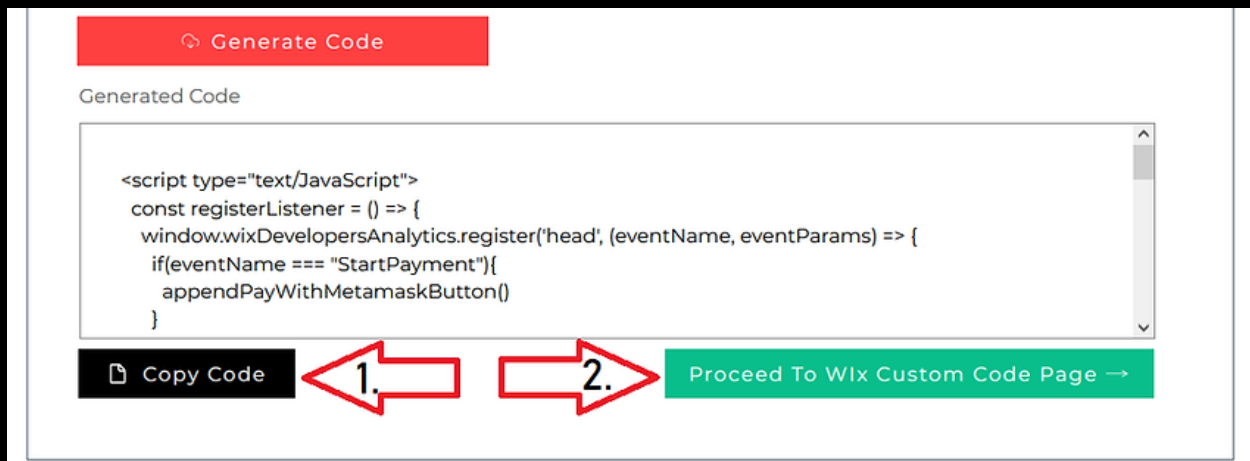

Choose Tokens To Be Used On Your Website (Default All Tokens Used)

- AEGIS
- AKITA
- AMPLIFI
- APCG
- APE
- ASTRA
- ATARI
- AUTH
- AWRT
- BABIL
- BABY
- BABYDOGE
- BEL
- BLOCK-E
- BLOCKS
- BOTZ
- BRC
- BTRFLY
- CODE
- CUBED
- CULT
- DCNT
- DEFY
- DEV
- DIONE
- DOE
- DOGEGF
- DOKI
- DPAY
- DSP
- EHIVE
- ELON
- ETH2.0
- FLOKI

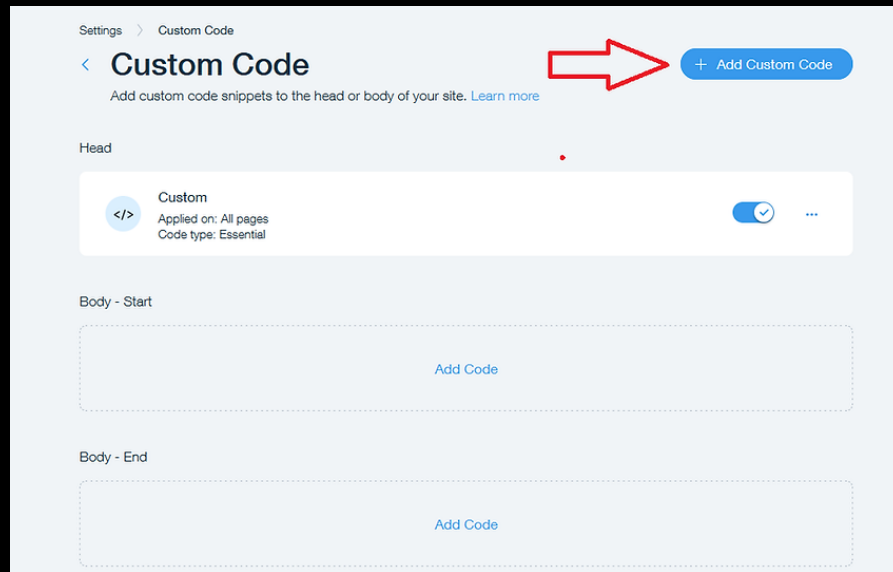

- Now that you have selected the tokens you wish to accept, or have let DiVinciPay auto-populate the token list, you will need to generate the DiVinciPay Custom Code. To begin, select the **GENERATE CODE** button.

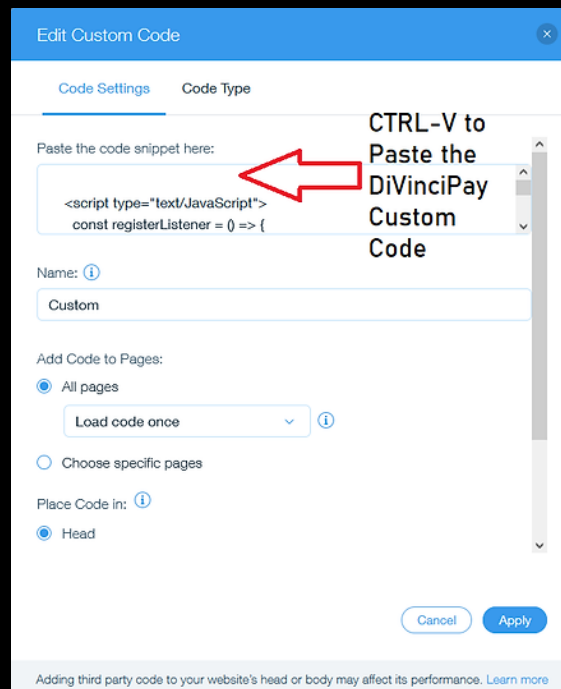

- Once you select the **GENERATE CODE** button, you will see the code auto-populate in the box below. Select the **COPY CODE** button (#1) and then select **PROCEED TO WIX CUSTOM CODE PAGE** (#2)

- Once you select **PROCEED TO WIX CUSTOM CODE PAGE (#2)** the custom code page will automatically open. Please select the **ADD CUSTOM CODE** button to paste the code.

- Now that you have selected the **ADD CUSTOM CODE**, a box will open. Go to the box that says **PASTE THE CODE SNIPPET HERE:** and click anywhere in the box, press **CTRL V**, then click **APPLY**, and lastly, close out of that screen. Scroll back to the top toolbar and open your DiVinciPay Dashboard and select **MY INSTALLS** to confirm your DiVinciPay installation has been added to your site.

- **Congratulations!!!!** Now DiVinciPay is added to your WIX store and you can immediately begin to accept ERC-20 tokens as payment for your goods and services.
